

## QUALITY POLICY

Meridian Logistics and Engineering focus has been to strengthen our position as a premier provider of engineering products and logistical services. To attain this goal, employees at all levels of the Company shall support the commitments of our Quality System which is aimed at an efficient service delivery with the objective of:

- Continuous improvement and review of our products and processes at all levels of operation,
- Delivering quality service that meets or exceeds customer, statutory and industry quality standards.
- Applying prevention rather than corrective techniques
- Providing a safe work place by providing adequate and appropriate resources.
- Minimizing waste by the use of high-quality material inputs, technology and efficient processing procedures.
- Constantly improving communication flow with customers for an effective service delivery.
- Employees will be trained on the quality system and this quality policy.

**This Policy shall be made available and communicated to all interested parties**
